

Rapid Deployment of Capable Workforce

Challenge:

An Original Equipment Manufacturer (OEM) sought out WorldLink as a trusted partner to deploy a next-generation telecom communication infrastructure across markets nationwide. The client wanted to leverage WorldLink's workforce management solutions to manage vital end-to-end logistics for systems engineering in the field that serviced markets throughout the United States.

Process:

To meet the challenge and scale up a highly-technical nationwide workforce quickly, while maintaining quality candidates and executing against SLAs. WorldLink developed a solution that included:

- Writing specific job descriptions
- Locating both active and passive candidates for consideration
- Coordinating interviews
- Performing technical assessments to qualify candidates
- Onboarding of approved candidates
- Asset distribution and recollection for a mobile Workforce
- Managing the resources on the project

300 resources

Source, qualified & placed in

90 Days

Nationwide

Here's how we did it.

Outcome:

The client achieved large time and cost savings by partnering with WorldLink's Workforce Solutions team. Although the initial deployment wave consisted of hiring 300 technical resources in 90 days, the project eventually swelled up to over 1,000 contractors. The client worked closely with WorldLink to achieve positive business outcomes. The turnkey project allowed the OEM to deploy a skilled team to oversee the client's telecommunications network nationwide, while leveraging WorldLink's ability to source, qualify, process and are for difficult-to-find contractors.

Upon Workforce deployment, WorldLink continued to manage the contractors until the project was completed beyond client expectations. Of additional value to the client. WorldLink was able to track and collect distributed assets for a disparate Workforce located throughout the country, reducing costs.
